

AVAILING ANTI-TUBERCULOSIS DRUGS

Tuberculosis is still one of the leading causes of morbidity and mortality. The San Juan City Health Office with the help of Department of Health offers diagnostic and medical services to eliminate this infectious disease.

The main objective is to detect and treat patients with TB through early diagnosis and by providing anti- tuberculosis medication free at the Health Center or DOTS facility. This program caters to presumptive TB clients meaning, patients who has a cough of more than two (2) weeks and other signs and symptoms such as coughing out of blood, afternoon low grade fever, body weakness, sudden loss of weight, and chest or back pains.
